

# AIRCRAFT ASSEMBLER RESUME

## Summary:

A motivated, highly-organized and skilled technician with a solid background in aviation and all phases of structural assembly and operations; proficiently in performing production, diagnosis and repair responsibilities; with a wide knowledge coupled with the ability to perform installations, analysis, checkups and malfunction detection plus operational testing of flight controls, fuel systems, and all associated components.

## Professional Experience:

Senior Aircraft Assembler February 2006 – Present  
ABC Airlines, San Diego, CA

### Responsibilities:

- Performed visual and physical inspections of aircraft assemblies to assure compliance to requirements.
- Measured composite assemblies as required and evaluated results for conformance.
- Performed inspections and tool prove-outs.
- Documented and reported non-conforming assemblies.
- Performed area inspections and surveillance as required.
- Performed other duties as assigned by Inspection Supervision.

Aircraft Assembler April 2004 – February 2006  
Qantas Air, Chicago IL

### Responsibilities:

- Assembled and attached system components to aircraft.
- Interpreted blueprints, illustrations, and specifications to determine layout sequence.
- Measure, drill, file, cut, bend, and smooth materials to ensure fit and clearance of parts.
- Inspected and documented nonconforming assemblies.
- Ensured strict adherence to safety policy and procedure.
- Performed first article inspections.

Junior Aircraft Assembler February 2002 – April 2004  
East Airlines, Los Angeles, CA

### Responsibilities:

- Performed visual and physical inspections of aircraft assemblies to assure compliance to requirements.
- Measured composite assemblies as required and evaluated results for conformance.
- Performed inspections and tool prove-outs.
- Documented and reported non-conforming assemblies.
- Performed area inspections and surveillance as required.
- Performed other duties as assigned by Inspection Supervision.

Aircraft Assembler April 2004 – February 2006  
Qantas Air, Chicago IL

## Education:

Universal Aviation Training, Aviation College, CA, 2002

## Skills:

- Strong ability to troubleshoot, diagnose and repair anomalies and failures.
- Ability to perform work from company's operational sheets.
- Great ability to read schematics.
- Excellent ability to operate ground support equipment associated with electrical applications.
- Deep knowledge and ability to perform removals, installations, extensive rigging and operational testing of flight controls, fuel systems, hydraulic systems, environmental systems, engines, landing gear and all associated components.
