### PROFESSIONAL EXPERIENCE

#### Junior DOT Net Developer

XL Soft Tech - August 2013 – August 2015

##### Key Deliverables:

- Involved in various phases of the development life cycle by gathering requirements, analysing, design and development.
- Followed Agile methodology with daily scrum meetings and provided user story updates.
- Worked on routing to load controller type using Asp.Net MVC for reaching appropriate action in the web application.
- Used MVC razor-view engine for re-using the individual user controls by not coupling them with underlying data elements.
- Used Asp.Net MVC framework to support the use of dependency injection to inject objects into a class; instead of relying on the class to create the object itself.
- Created application using HTML5, React.Js, AngularJS, and Bootstrap for responsive design.
- Heavy use of knockout.Js view models for separation of ui, data, and logic concerns.

#### .Net Developer

ABC Corp - 2012 – 2013

##### Key Deliverables:

- Designed and coded applications based upon detail specifications of business and/or user requirements.
- Ensured effective integration of software across products, platforms and environments.
