Francisco, CA 94105

## HIGHLIGHTS

- Troubleshooting
- Production Well Testing
- Strong verbal communication
- First Aid/CPR Certified
- File/records maintenance
- Hardworking
- SCBA/SABA/EBA Experience
- Quick learner
- H2S/Fit Test Certified
- Reports generation and analysis

## EDUCATION

Klein HS  
Spring, TX • 2002

*High School Diploma*  
Related coursework: Level 1  
networking, auto mechanics, small  
engine repair and welding.

## SUMMARY

Experienced Oilfield Associate, excellent at juggling multiple tasks and working under pressure. Broad industry experience includes Production Well Testing, H2S Safety and Fire Protection/First Response.

## ACCOMPLISHMENTS

Flowback Operation

- Supervised team of three members.

Protective Services

- Applied safety procedures and policies as outlined in OSHA Procedure Standards and Job Safety Analysis.

Safety Supervision

- Worked directly with Rig Operators, Transport Operators and Company Men to implement safety precautions, evacuation routes and standard job procedures

## EXPERIENCE

Sgs Group - Production Well Testing

WY • 04/2012 - 06/2012

I worked as a Junior Operator in which I ran and laid iron from wellhead to designated areas ( i.e. manifolds, separators, sand traps, ball catchers, frac tanks, flare stacks, etc.) maintained wellhead pressure and output, controlled fluid levels and fluid transportation, worked in high level H2S conditions (Ex. 96000 PPM) and wrote and sent daily numbers report.

Reference: Dylan Koonce, Senior Operator / 903-806-7043

TC Safety - Field Technician

STATE • 01/2012 - 04/2012

I worked as a H2S field technician in which I set up H2S, LEL, O2 and CO2 sensors in key locations around wellhead, frac tanks, flares, and loading/unloading areas. I implemented air trailers with SABA hook-ups, wind socks, chemical showers and eye wash stations. I also designated muster areas and posted SCBA's within those areas as well as posted EBA's in all crucial areas. I took gas samples and air samples with gas cylinders and RAE tubes, stopped and inspected all personnel entering location for current H2S certification and FIT testing.

Reference: Jaime Ortega, Operations Manager /

On-Site Safety - H2S Specialist / Industrial Firefighter

STATE • 02/2011 - 11/2011

I had many duties while working here. One of which was being the Safety Supervisor for Brigham Oil & Gas contracts. These duties included holding daily safety meetings for crews and oil company consultants, safety audits for the wellsite and training in fire prevention. (SCBA's, SABA's, fire suppression units, etc.) Other duties included monitoring H2S/LEL levels. I was trained to use Rigrat II's and III's as well as P.U.M.A. and L.Y.N.X. systems and personal 4way BW gas detectors. I also performed Fire Protection for fracturing crews using flammable liquids: (diesel fracs, hydrocarbon fracs, oil, etc.)

Manek Energy - Production Well Tester

STATE • 09/2009 - 10/2010

Started out as an Operators Assistant doing "flowback". About 7 months later was promoted to Operator. About 5 months after that the company was sold to Weatherford.
