EDUCATION

**Bachelor's Degree in
Management of Engineering
and Technology, 2012**

Rudolf Steiner College, Fair
Oaks, CA

SKILLS

- Admirable experience in design and engineering of High Pressure Valves and Pipe.
- Familiar with off-highway/construction/agricultural equipment.
- Familiar with 3D modeling software, and ProEngineer Wildfire 3.0•
- Profound knowledge of fluid dynamics, kinetics, strength of materials, unit ops, and thermodynamics.
- Thorough knowledge of pneumatic, hydraulics, material handling, batching, dust collection, and machine alignment principles and systems.
- Deep knowledge of the Building and Plumbing Codes, as well as ASME and ASHRAE Standards.
- Huge knowledge of engineering hardware design, and fabrication testing processes.
- Proficient in working in/communicating with multidisciplinary team environment.
- Proficient in developing robotics (conceptualization, design, prototyping/execution and integration).
- Remarkable ability to work cross functionally.
- Outstanding ability to work and succeed in a team environment.
- Immense ability to create and maintain positive customer and stakeholder relationships.
- Uncommon ability to work in a government-regulated environment.
