EXPERIENCE

Grady, Koelpin and Hyatt

Phoenix, AZ // Experienced Mechanical Engineer // 01/2019 – present

- Provides engineering design disposition on discrepancies (e.g., rejection tags, production action requests, shop revision requests) for assembly, integration, and test activities related to wire harness installation (VE)
- Bachelor's Degree or higher in Engineering or related technical field
- Three (3) or more years' experience with wire harness, electrical and/or mechanical design
- Bachelor's Degree or higher in Electrical, Mechanical, Aerospace Engineering
- Interpret wire harness requirements and then create/draw/release schematics and wire list data packages

Toy-Schaefer

Phoenix, AZ // Experienced Mechanical Engineer // 05/2016 – 10/2018

- Create/draw/release detailed wire harness assembly and installation drawings
- Leads the pre-studies to define the most effective solutions
- Manages the design or integration by respecting the best practices of its business (internal, external standards, quality system, capitalization, archiving) in collaboration with all the relevant professions
- Pilots the realization, installation and commissioning

EDUCATION

School of the Art Institute of Chicago

Bachelor's in Engineering

SKILLS

- Manages change requests
- Implements the quality system and the methods of his/her group (risk analyzes, FMEA, design reviews, quality planning, technical dossier, treatment of non-conformities, ...)
- Obtains validations after the phases of realization, installation, start-up and development of the equipment made in collaboration with related field of expertise of the industry
- Supports prototype projects managed by the process development teams
