 - Preventative Management
 - Production Planning & Scheduling
 - Process Redesign & Reengineering
 - Team Building & Leadership
 - Project Management
 - Safety & Regulation Compliance
 - Resource Allocation & Administration
 - Client Relationship Management
 - Quality Control Management
-

PROFESSIONAL EXPERIENCE

ABC OILFIELD COMPANY – SOMEWHERE, AB

1986 – Present

Rig Manager, 1998-2008

Manage all facets of drilling and service rigs throughout Alberta and British Columbia for major Alberta-based oil and gas exploration company. Monitor pressure gauges, rotary head speed/pressure, and detect binding or stoppage of drills; perform minor repairs in order to minimize equipment downtimes. Provide training to 22 on-site employees and ensure safe, productive work to optimize production. Supervise all rig activity on double and triple rigs; performing vertical, directional, horizontal, and horizontal under-balanced drilling. Sustained ongoing communication with engineer regarding drilling concerns and observations. Administered company, government, OHS, WCB, and AEUB guidelines and regulations.

Key Achievements:

- **Reduced lost time accidents 25%** by implementing extensive job and safety training that facilitated team's ability to effectively identify, isolate, and eliminate work hazards.
- Ensured integrity of multi-million dollar oilfield equipment to **avert downtime**, and maintained visual aspects of oilfield site to promote cleanliness and **enhance safety of crew**.
- **Increased production by more than 15%**, eliciting positive feedback from oil companies.
- Established, and nurtured customer base by understanding customer satisfaction and when necessary **"put out fires"** immediately to rebuild clients' confidence and loyalty.
- Developed extensive list of industry contacts; **maintained an excellent reputation** through exceptional interpersonal skills, hard work, and word-of-mouth.
- **Promoted through a series of increasingly responsible positions.**

Driller, 1993-1998

Ran drilling rig, ensuring maximum security and safety of crew and lease at all times. Organized crew to make certain that they remained focused and on-task. Oversaw moves, positions, and set-ups of the rig at desired location; dismantled rig at the end of each job. Maintained pressure and torque gauges of the bit. Kept up-to-date
