

# Talar Mabe

Database Analyst

## Details

[talar.mabe@gmail.com](mailto:talar.mabe@gmail.com)

(703) 079-9934

1234 Oak Street, Springfield, IL 62704

## Profile

Results-driven Database Analyst with 2 years of experience in designing, implementing, and maintaining database systems. Proficient in data analysis, SQL optimization, and troubleshooting, while consistently ensuring data accuracy and integrity. Strong collaboration skills and proven ability to work efficiently in fast-paced environments. Dedicated to enhancing business processes and decision-making through data-driven insights.

## Employment History

### Database Analyst at Microsoft Corporation, IL

Mar 2023 - Present

- Successfully migrated 50 TB of critical data from legacy systems to Microsoft Azure, reducing maintenance costs by 30% and improving data retrieval times by 25%.
- Enhanced database performance by 40% through the optimization of SQL queries and the implementation of indexing strategies, leading to quicker report generation and improved user satisfaction.
- Developed and implemented a comprehensive data backup and recovery plan, resulting in a 99.9% uptime for the databases and a 75% reduction in data loss incidents.
- Streamlined data integration processes by automating ETL workflows, increasing data accuracy by 20% and reducing manual data entry efforts by 60%.

### Junior Database Analyst at Oracle Corporation, IL

Sep 2021 - Jan 2023

- Successfully reduced query response time by 30% through optimizing database performance and implementing indexing strategies, resulting in increased efficiency for end-users.
- Developed and deployed a data migration plan for transitioning from legacy systems to Oracle Database, leading to a 25% improvement in data integrity and accuracy across the organization.
- Identified and resolved over 100 data discrepancies and inconsistencies, significantly enhancing data quality and ensuring 99% accuracy in reporting and analytics.
- Collaborated with cross-functional teams to design and implement a new database schema, resulting in a 20% reduction in redundant data storage and improved data accessibility for users.

## Education

### Bachelor of Science in Data Analytics at University of Illinois at Urbana-Champaign, IL

Aug 2017 - May 2021

Relevant Coursework: Statistics, Data Visualization, Database Management, Data Mining, Machine Learning, Big Data Technologies, Advanced Analytics, Programming (Python, R, SQL), and Business Intelligence.
