## Hobbies

## Profile

Database Specialist with 2 years of experience in designing, implementing, and maintaining database systems. Proficient in SQL, data analysis, and optimization, with a strong background in data integrity and security. Adept at collaborating with cross-functional teams and effectively communicating technical concepts to non-technical stakeholders. Demonstrated ability to troubleshoot and resolve complex issues to ensure optimal system performance.

## Employment History

### Database Specialist at C Spire, MS

Apr 2023 - Present

- Successfully migrated 50+ databases to a new data center, ensuring seamless transition with zero downtime and reducing overall maintenance costs by 15%.
- Optimized database performance by implementing advanced indexing strategies, resulting in a 25% improvement in query response times and increased productivity for end-users.
- Developed and implemented a comprehensive backup and disaster recovery plan, which reduced the average recovery time from 8 hours to 2 hours, ensuring business continuity and minimal impact on operations.
- Trained and mentored a team of 5 junior database administrators, leading to a 30% increase in team efficiency and streamlined database management processes.

### Junior Database Specialist at KeyStaff, MS

Sep 2021 - Feb 2023

- Implemented a new database management system across the company, resulting in a 20% increase in data processing efficiency and a reduction in data errors by 15%.
- Successfully migrated and consolidated multiple legacy databases into a single, unified system, reducing data storage costs by 30% and improving data retrieval times by 25%.
- Developed and delivered training programs for over 50 employees on effective database usage, leading to a 10% improvement in overall productivity and a 5% reduction in data-related issues.
