- Microsoft applications skills
- Attention to detail

WORK HISTORY

HYDRO TESTING FOREMAN 06/2015 to CURRENT

Delta Constructors | City, STATE

- Schedule and meet deadlines of quality assurance department to meet clients expectations.
- Read isometric drawings to ensure tests will be conducted on proper piping spools that client has specified for test.
- Conduct hydrostatic and pneumatic pressure testing on piping ranging from 1" to 12" diameter.
- Test pressures ranging from 25 PSI to 7500 PSI depending of flange ratings and pipe thickness.
- Ensure proper torque values have been applied prior to filling lines with fluid or air.
- Document testing pressures and turn into quality control department to show client.
- Maintain and inspect tri-plex pumps to ensure no failure during tests.
- Assist field crews in re-commissioning piping and valve upon test completion.

WELL SUPPORT- TIE IN LEAD 05/2012 to 06/2015

Ch2mHill Energy & Chemicals | City, STATE

- Manage a crew of five employees to conduct disassembly and reassembly of well tie in configurations to allow for a well work over. Piping and valves ranging from 1" to 10" were utilized
- Organized fabrication and modification of old and new piping spools per isometric drawings.
- Ensured crew conducted work in a safe and efficient manner with client expectations exceeded on a regular basis.
- Conducted lock out tag out of well lines prior to disassembly of piping to ensure employee, and environmental safety.
- Conducted post job walkdowns to ensure everything was torqued and installed properly per isometric drawings and P&ID's

CORROSION UNDER INSULATION- CREW LEAD 09/2008 to 05/2012

Ch2mhHill Energy & Chemicals | City, STATE

- Conducted insulation removal and corrosion mitigation on various piping diameters to prep for corrosion inspection.
- Installed insulation on piping after inspection was conducted and deemed safe for continued operation.
- Ensured crew conducted safe and efficient work.
- Organized work campaigns to ensure work was completed in an efficient manner to meet clients expectations.
- Tracked completed work locations and turned in daily reports to management.
