CAREER OBJECTIVE

Looking for employment as an ASP.NET Developer and work for a great company in order to apply my skills and past experience.

WORK EXPERIENCE

ASP.NET Developer | Diverse Lynx

Michigan, USA (2016-Present)

- Maintained existing software systems by identifying and correcting software defects.
- Developed and maintained applications and databases by evaluating client needs.
- Analyzed requirements and developed software systems.
- Worked with the project manager to negotiate contracts and agreements with software vendors and other Internet companies.
- Participated in projects to introduce the flagship product to the client's computing environment.

ASP.NET Developer | VSolvit LLC

Michigan, USA (2014 - 2016)

- Developed web-based software, components, and services using Microsoft .NET.
- Consulted with clients to understand needs and communicate the use of the .NET platform as a strategic business tool and application platform.
- Performed software development activities including requirements gathering and analysis, systems design, development, documentation, testing, and integration.
- Implemented complex, high quality, scalable, and extendable end-to-end solutions, using either out-of-the-box or custom functionality.
- Worked closely with product managers, software architects, and other application developers on application design and development.
