PROFESSIONAL SUMMARY

I have been retired from teaching for the last 8 years and have been involved in church work at the Harrisonville United Methodist Church. I have done volunteer work for Children's Mercy Hospital and hospice care.

I have 4 children, 6 grandchildren and 2 great-grandchildren. In the summers, I have had a Cousin Camp for my grandchildren and planned themed activities for them that they have loved. Activities were planned with a nod to education as well as fun.

I was known in my school district for doing things with my students that were a little out of the ordinary. For many years we collected money, usually through recycling efforts, bought a tree and planted it for Earth Day each year. One year we worked with the zoo to make decorated animal ceramic tiles that are still on display at the zoo. I instituted the Science Fair at Harrisonville Junior High, which I continued as the school changed from a Junior High to a Middle School until I retired. I have been involved in teaching all girl and all boy classes as well as teaching special education students and classes geared to ability level. While at Presentation School, I was involved in planning and carrying out church services with my students and planned and carried out a religious retreat with my 8th grade students. I believe in hands-on learning and feel that science in particular is best learned through activities. I have a great deal of varied experience that I would like to share with your students.

SKILLS

Certified Elementary Education K-8

Certified General Science 7-9

Certified Unified Science: Biology

WORK HISTORY

high school science teacher, 07/2007 - 09/2009

Nogales Unified School District – Nogales, AZ

Taught high school classes:

Anatomy and Physiology

Chemistry

Physics

Zoology

Botany

Genetics

Environmental Science

Biology
