- Project management
- Environmental impacts
- UK building regulations
- AutoCAD, Autodesk Revit
- ARB registered Architect

Career Summary

Jun 2019 - Present

**Freelance, JR Architecture
Architect**

Outline

Freelance Architect partnering with clients UK-wide to design and produce sustainable, creative and elegant structures and public spaces, with a focus on reducing the carbon footprint.

Key Responsibilities

- Meet with clients to discuss project objectives, needs, and budget
- Prepare and present design proposals, including detailed drawings of finished buildings, renovations, or restorations
- Meet with construction professionals and clients to discuss feasibility of designs
- Review local regulations to ensure the construction project falls within all constraints
- Create detailed drawings and specifications for architectural projects
- Work with various computer-aided design software systems to create blueprints and 3D models
- Work with Contractors, Surveyors, and Building Service Engineers to create a construction schedule and bring designs to fruition
- Coordinate work between various contractors and resolve issues that arise during construction
- Supervise the construction of buildings to ensure projects meet deadlines, stay on budget, and adhere to the original design vision

Key Achievements

- Partnered with Cardiff City Council to assist in producing propositions for a £150m revamp of the city centre.
- Successfully lead a project to add more green spaces in industrial areas around Cardiff, decreasing air pollution by 15% within 12 months.
- Consistently delivered projects which exceeded client expectations to client specs and 12% below budget.
- Designed 20+ £10M+ projects from requirement-gathering through to completion.
