## Profile

As a Network Security Engineer with over 3 years of experience, I have managed the daily operations of a variety of networks and systems, from small local networks to high-performance data centers. I have extensive experience in network security, firewall configuration and maintenance, network monitoring, and troubleshooting. I have also implemented and supported policy enforcement tools such as intrusion detection systems. In addition, I have developed and maintained secure network architectures and provided guidance on network security best practices. My experience has allowed me to develop excellent problem-solving and communication skills, as well as a comprehensive understanding of the latest security technologies.

## Employment History

---

### Network Security Engineer at Walmart, AR

Oct 2022 - Present

- Successfully implemented a comprehensive network security policy for Walmart's AR facilities. This included the installation of firewalls, intrusion prevention systems, and advanced malware protection, resulting in a 90% reduction in security incidents.
- Designed and deployed a secure virtual private network (VPN) across all Walmart's AR locations, enabling secure remote access to the corporate network. This resulted in improved employee productivity and reduced operational costs by 20%.
- Developed a comprehensive network security training program for all Walmart's AR employees. This program was successfully completed by over 500 staff members, resulting in an 80% reduction in security breaches due to user error.

### Network Security Associate at Tyson Foods, AR

Jul 2020 - Sep 2022

- Implemented a security solution that prevented 60% of malicious network intrusions, resulting in a reduction in security incidents by 30%.
- Developed and maintained network security policies for Tyson Foods that included the implementation of firewalls, encryption, authentication and access control.
- Conducted regular audits of network traffic to identify and address any security threats, leading to a decrease in network downtime by 25%.

---

## Education

---

### Bachelor of Science in Network Security Engineering at University of Arkansas at Little Rock, AR

Aug 2015 - May 2020

Relevant Coursework: Network Security, Network Design and Implementation, Computer Forensics, and Cryptography.
