

JESSICA CLAIRE

 resumesample@example.com

 (555) 432-1000

 Montgomery Street, San Francisco, CA 94105

SKILLS

- R (Statistical Programming)
- Data Visualization
- Data Mining
- Statistics / Statistical Modelling
- Experimentation and Hypothesis Testing
- Python
- SQL
- Dashboard Development
- Pyspark
- Cloud Computing (Azure and AWS)

EDUCATION AND TRAINING

Bells University of Technology
Ogun • 11/2020

Bachelor of Science: Management Science

- Dissertation:- Management Intelligence: **Quantitative Analysis** and Decision Support Systems for Management.

CERTIFICATIONS

1. Microsoft Data Scientist Associate
2. Microsoft Azure AI Engineer Associate. (Andela and Microsoft Scholarship 2021)
3. Data Engineering Nanodegree, Udacity
4. Deep Learning Specialization. DeepLearning.ai

SUMMARY

Highly motivated Data Professional experienced in gathering, processing and analyzing relevant business data. Advanced understanding of statistical modelling, machine learning and other analytical methodologies. Passionate and diligent with significant experience in leveraging machine learning and cloud technologies to solve business problems.

EXPERIENCE

Avanade - Analyst - Data Science
Columbia, SC • 03/2023 - Current

- Hiring and managing qualitative researchers.
- Designing surveys and data collection tools
- Analyzing behavioral data
- Conducting randomized control trials and A/B tests.
- Statistical modelling

Kbr - Data Scientist
Point Mugu, CA • 04/2022 - 02/2023

- Built segmentation algorithms for marketing optimization.
- Built and deployed machine learning models as Flask API
- Built internal web apps for Machine Learning Applications such as Sentiment Analysis.
- Experimented on forecasting algorithms.
- Deployed Transformer models for highly efficient execution of Natural Language Processing tasks.

Motion Recruitment - Session Lead - Python Data Analysis
Oxnard, CA • 04/2022 - 01/2023

- Coached and Mentored 125 students on Python Data Analysis
- Helped debug and solve technical challenges encountered by students.
- Created Python-based tutorials and projects.

Tech Air - Data Analyst
Ventura, CA • 04/2021 - 03/2022

- Built an OCR tool **automate data extraction** from documents.
- Determining data sources for reports and projects.
- Producing **data driven publications** using **statistical modelling** and **data visualization**.
- **Collaborating with internal stakeholders** to identify and **gather analytical requirements** for customer, product and projects needs.
- Developed a **dashboard** for operations team to enhance data mining, management and analysis techniques.
- **Designing and engineering data gathering** solutions such as **surveys** and **web scrappers**.

Omdena - Junior Machine Learning Engineer
City, STATE • 11/2021 - 02/2022

- **Identifying, researching and evaluating** relevant **Machine Learning applications and papers**, distilling the details in technical but easy to read reports.
- **Implementing** state of the art **architectures in code**.
- **Co-designing** a method to **estimate** the depth of water bodies(**Bathymetry**) using satellite imagery.

First Marina Limited - Project Manager
City, STATE • 06/2019 - 09/2019

- **Collaborated with teams** of technicians to execute chains of activities on a large real estate project.
- **Designed policies** to mitigate costs due to foreseeable errors, injuries and loss of materials.
- **Delivering** at about **20% under budget**.
- **Forecasted, scheduled and monitored** project timelines, personnel performance and cost efficiency.

Olayinka Oyebola & Co - Data Analyst/ Consulting Intern
City, STATE • 06/2014 - 10/2018

- **Tracked, analyzed and reported** findings in business data.
- Completed audits on financial data for over 5 client accounts.
- **Supervised data capturing** project for an **ecommerce giant**, ensuring completion before scheduled time and hence 10% under budget.

ACTIVITIES AND HONORS

- **Engineering Project Manager** (Intern) on a large construction site.
 - **Class representative**. Provided much needed organization for digital learning.
- Virtual Experiences with:**
1. **Australian and New Zealand Banking Group**. Built Machine Learning models with Linear regression and decision trees.
 2. **Quantium Consulting** - Developed customer centric data science strategy using customer analytics and association mining.
 3. **Boston Consulting Group (BCG gamma)** - Built customer churn models with logistic regression.
- Publications:**
- Getting Started with Computer Vision on Microsoft Azure. Published in CodeX 2021 (<https://doluclodes.medium.com>)

- <https://doluclodes.medium.com>

CONFERENCES AND WORKSHOPS

- Open Data Science Conference West 2021.
- Nvidia GPU Technology Conference 2021.
- Data Science Nigeria AI Bootcamp 2021.
- AfroTech Conference 2021
