EXPERIENCE

DIRECTOR AVIATION SAFETY

New York, NY

02/2014 – present

- Oversees the administration and ongoing enhancement of the Flight Data Monitoring (FDM) system
- Performs financial planning for all areas of the Aviation Safety team
- Leads the recruitment, training, and professional development of world-class Aviation Safety team members
- Participates in industry groups seeking to identify 'best practice' in flight safety and airworthiness
- Monitors and communicates industry flight safety events and best practices that occur outside the Bristow Group
- Ensures effective use of data gathering and analysis systems relating to flight safety, including Air Safety Reports (ASR's), Ground Occurrence Reports (GOR's), and Aircraft Accident/Serious Incident Investigation Reports
- Actively participates as safety subject matter expert in meetings/discussions on subjects which may have an impact on Bristow Group's flight safety risk profile – such as: new contract bids/awards, introduction of new technical support systems and equipment, development of new operating locations, etc

ASSOCIATE AVIATION SAFETY OFFICER

San Francisco, CA

03/2011 – 09/2013

- Assists in the development of quarterly Risk Assessment Indicators and analyzes the level of safety of aviation activities within a field mission
- Monitors the integration of Aviation Risk Management into UN aviation activities
- Provides safety briefings to personnel involved in UN aviation activities
- Conducts initial aircraft inspections and participates in the performance evaluations of civilian air operators and military aviation units
- Develops inputs for aviation safety budget
- Maintains the aviation safety database and ensures that information is recorded in accordance with the established procedures and deadlines
- Develops inputs for the Aviation Emergency Response Plan and communicates it to all officials concerned
