.NET Developer (Intern) at Human Resources Administration (MIS)

Summary

I'm a competent, assertive, and dedicated IT professional, equipped with progressive experience in software development.

Work experience

Jul 2000 - Present

.NET Developer (Intern)

Human Resources Administration (MIS)

- Created modifications for custom document imaging / indexing application used by hundreds of agency employees across the city, using C#, ASP.NET, and JQuery.
- Created complex queries and analyzed data stored in SQL Server databases.
- Created MS Excel reports based on analyzed data from SQL Server and MS Access queries.
- Assumed additional duties as needed.

Apr 2000 - Jun 2000

IT Support Assistant

AVC College of Technology (CJ-PR)

Notable Contributions:

- Created web application to display inventory of PCs in computer lab and troubleshooting history with each workstation selected. Technologies used include ASP.NET, VB.NET, and SQL Server.

Responsibilities:

- Performed or assisted with installation and maintenance of hardware and software in academic computer labs and smart classrooms.
- Helped supervise staff of over twenty-five college assistants who maintain the open computer labs.

Feb 2005 - Nov 2008

Programmer

Frederick's Goldmine, Inc. is one of the largest jewelry manufacturing companies in North America offering its customers a large selection of jewelry products across its five separate divisions with manufacturing resources in the US, Mexico, China, India, Thailand and Korea.

Notable Contributions:

- Provided application support for user community of over 250 people across two countries for all in-house applications written in VB, RPG, HTML, ASP, and MS-DOS batch files.
- Converted all corporate VB 6.0 applications to VB .NET Windows applications.
- Reassigned as the only Visual Basic programmer in the company able to assume full responsibility for creating numerous corporate applications from inception to installation.
- Created Visual Basic programs including (but not limited to):

***EDI Upload Application** - converts and cleans up Excel files to CSV files for upload into AS400 order entry system as alternative to EDI for special orders.

***Operations Console** - automates download of shipping label information for batch processing.

***Overseas Invoice Reconciliation Report Application** - a report generating tool, first using MS Access for user security, then creating user-friendly query tool to display a custom Crystal Report
