PROFILE

Database Administrator with 5+ years of experience in maintaining and implementing enterprise-supported databases and software. Highly skilled at designing, upgrading, tuning, and automating database infrastructures. Seeking a position at Beyondsoft to implement data transformation processes guaranteed to improve your company's position in the industry.

PROFESSIONAL EXPERIENCE

September 2019 – Present

Database Administrator

EPB – Chattanooga, TN

- Collaborate with 30+ IT project managers, database programmers, and multimedia programmers to maintain the company database's integrity and security
- Quickly respond to 80+ front-end users and efficiently troubleshoot their issues in adherence with relevant data protection laws and regulations
- Spearheaded installation and customization of new applications in 300+ company computers in July 2020
- Complete 10+ high-quality projects monthly and conduct debugging exercises to ensure functional requirements are met

June 2017 – August 2019

Database Administrator

Yates Services – Smyrna, TN

- Designed, managed, and maintained 4 multi-vendor database infrastructures, and ensured they consistently met business needs
- Performed recovery and backup of database servers and distributed server backup during emergencies
- Spearheaded a \$1 million data integration project and provided database deliverables such as logical databases, security policies, capacity planning, and data maintenance plans
- Served as a liaison and coordinated the support of external vendors in scheduling and performing software patching
