## Professional Summary

Would like to work in an agricultural setting with the ability to be involved in more research and training. I have several years experience in various agricultural fields and the flexibility to learn new skills.

## Skills

- Several years experience in the poultry industry and farm management
- Certified nutrient management planner
- Operated several types of farm equipment
- Basic welding skills
- Pesticide applicator license and training
- Involved with management and care of my families breeder hen farm for over thirty years
- Currently own and manage a small herd of cattle and sheep with a strong emphasis on rotational grazing and soil health.

## Work History

**Agricultural lab technician**, 10/2015 to Current

Cardno – Pittsburgh, PA

- Main responsibilities are making feed for swine and beef farms.
- Occasionally help with livestock care and some forage research on the North farm.

**Water Quality Technician**, 02/2014 to 09/2015

Carroll County Conservation District – City, STATE

- Wrote nutrient management plans for farms located in nutrient surplus areas. This included soil sampling and working with land owners with mostly phosphorus management on their property.
- Also assisted NRCS with limited amount of conservation planning.

**Company Farm-Broiler Production**, 05/2006 to 02/2014

Georges – City, STATE

- Performed several job duties with this company.
- Started as a broiler service technician which included supervising broiler production on 25 farms in Missouri and Arkansas.
- Also worked in the feed mill and mill maintenance shop performing many different duties.
- Also scheduled and cleaned poultry houses on company owned farms for litter transport out of nutrient surplus areas.

## Education

**Bachelor of Science: Dairy Science**, 1985

University of Arkansas - Fayetteville
