## Experience

**Aviation Supervisor of Logistics** , 02/2010 to 03/2013

**U.S. Army Active Duty** – City, STATE

- Sustained safety protocol while executing pilot and ground personnel logistics.
- Constructed, extracted and analyzed statistical projections concerning employment and usage of aircraft.
- Implemented airfield safety procedures to support safe operating environments for personnel and aircraft.
- Directed ground crews in loading and unloading of aircraft cargo or baggage.
- Inspected airfield conditions to verify compliance with federal regulatory requirements.
- Coordinated with agencies to meet aircrew requirements for billeting, messing and refueling.
- Responded to emergent situations regarding flight operations or medical issues to quickly identify concerns, provide support and transport personnel and passengers away from critical scenes.
- Authored and presented technical reports and documents to Federal Aviation Administration, Kansas Department of Transportation and other regulatory bodies.
- Strengthened traceability, developing organization systems for record, report and agenda distribution.
- Automated office operations, business group correspondence, acquisition record tracking and data communications.
- Reviewed airfield construction and repair project priorities to determine impact on airfield operations.

**Hearing Conservations Specialist**, 02/2006 to 03/2013

**US Army** – City, STATE

- Stayed up to date on advances in treatments and devices by attending workshops and reading publications.
- Taught clients how to correctly operate, maintain and store hearing aids.
- Performed careful fittings to maximize client comfort and device effectiveness.
- Set up 700 full examinations to test individual hearing impairment.
- Maintained up-to-date knowledge of latest research and trends through extended education and professional development courses.
- Analyzed current literature from professional organizations and conferences to stay current with developments in audiology.
- Demonstrated assistive listening devices to clients.
- Counseled patients and families on communication strategies to cope with hearing loss.
- Understood and followed oral and written directions.
- Provided excellent service and attention to customers when face-to-face or through phone conversations.

**Hazardous Material Certifier**, 02/2005 to 03/2013

**Fort Riley, KS, U.S. Army** – City, STATE

- Participated in local prevention programs, conducting public education activities to promote fire public awareness.
- Quarantined chemicals and followed company guidelines, Environmental Protection Agency rules, Department of Transportation regulations and disposal site protocols.
- Identified unknown materials utilizing HazCat Kit.
- Protected emergency response forces, responding to calls and hazardous material incidents.
- Tracked chemical inventories and environmental sampling.
- Conducted emergency scene risk analysis to determine boundaries, proper personal protective equipment, mitigation, clean up and packaging protocols.
- Handled oxygen and gas monitors and mercury vapor analyzer.
- Inspected commercial and public buildings to comply with fire codes and inspection standards.
- Complied with company policies, as well as federal and local requirements, to maintain team and public safety.
- Utilized industry knowledge to identify and address contaminants, including asbestos lead and oil, at Ft Riley KS and deployment locations.
- Developed clean-up and removal strategy for each individual case based on materials in question and available resources.
- Used monitoring equipment to identify locations and severity of contamination in in hanger structures.
- Built structures to contain spills or hazardous areas prior to clean-up and removal.

**Test Measurement Diagnostic Equipment Specialist** , 02/1999 to 03/2013

**US Army** – City, STATE

- Installed medical equipment after comprehensive inspection, calibration and testing.
- Administered preventive maintenance on medical equipment according to equipment schedule.
- Calibrated and monitored devices following installation.
- Followed privacy regulations and safety protocols.
- Wrote and executed test procedures and documented results.
- Inspected malfunctioning medical equipment with test and analysis instruments.
- Examined facility's structural environment and equipment to protect patients and staff from electrical or mechanical hazards.
- Demonstrated correct operation and preventive maintenance of medical equipment to personnel.
- Reported data for maintenance, installations and inventory assessments.
- Conducted comparative equipment evaluations and recommended enhancements or new equipment.
- Analyzed part lists to requisition parts for repairs.
- Classified excess and in-use medical equipment condition to determine serviceability.
- Prioritized and organized tasks to efficiently accomplish service goals.
- Demonstrated leadership by making improvements to work processes and helping to train others.

## Education and Training

**MBA: Organizational Development** , 12/2017

**University of Incarnate Word** - San Antonio, TX
