EXPERIENCE

LVN-Covid Vaccine and Testing (Lead LVN), 02/2021 - Current

Acadia Healthcare Inc. – Pontotoc, MS

- Observed strict confidentiality and safeguarded all patient-related information.
- Worked with registered nurses to deliver comprehensive, high-quality care to [Type] patients.
- Evaluated patient care procedural changes for effectiveness and made necessary adjustments.
- Directed implementation of improved patient care and documentation methods and procedures to achieve quality objectives.
- Kept EHR updated with patients' vital statistics, tracking metrics and observations about behaviors or responses.
- Collected biological samples for routine laboratory testing to assist diagnostic processes.
- Monitored patient's respiration activity, blood pressure and blood glucose levels in response to medical administration.
- Communicated concerns regarding clients' status, care and environment to nursing supervisors, clinical care supervisors and case managers.
- Answered patient and family questions to educate on optimal treatment procedures.
- Prevented drug interactions and contributed to correct diagnosis by recording patient health information, monitoring vitals and updating patient files.
- Collected biological specimens and packaged for laboratory transport to complete diagnostic tests.
- Utilized computerized Resource and Patient Management System (RPMS) and Electronic Health Record (EHR) system.

Licensed Vocational Nurse, 01/2012 - 11/2020

Res-Care, Inc. – Kerrville, TX

- Observed strict confidentiality and safeguarded all patient-related information.
- Collected biological samples for routine laboratory testing to assist diagnostic processes.
- Took blood, tissue and fluid samples to perform laboratory tests.
- Provided pre- and post-operative nursing care.
- Addressed patient care needs, collected vitals, dressed wounds and managed catheters.
- Monitored infection control procedures to verify facility-wide health and safety.
- Sterilized equipment and supplies using germicides and autoclaves to protect patients and staff from infection.
- Charted changes in patient conditions and discussed concerns with supervising healthcare provider.
- Answered patient calls, identified issues and determined how best to provide assistance within parameters established by facility and supervisor.
- Utilized computerized Resource and Patient Management System (RPMS) and Electronic Health Record (EHR) system.
- Administered medications and therapies in accordance with physicians orders.
- Performed triage to maximum team productivity and effectiveness.
- Directed implementation of improved patient care and documentation methods and procedures to achieve quality objectives.
- Administered general care to patients, including recording of temperature and blood pressure, wound dressing and testing.
