Alabama.

### Objective

Network Security Engineer with 6+ years' experience with Cisco ASA, Checkpoints, Juniper SRX, Fortigate, Palo Alto, Network Switches/Routers, LAN/WAN/WLAN, TCP/IP, VPN, and hardware/software security applications. Skilled at end user support, network troubleshooting, intrusion detection/prevention, encryption, WAF, packet filtering firewalls, malware analysis, vulnerability scans, pen testing, and preparing security policies.

### Skills

Network Security, C.

### Work Experience

#### Network Security Engineer/Administrator

**ABC Corporation** - October 2010 - November 2011

- Protect and defend; identification, analysis, and mitigation of threats to internal and external IT systems or networks.
- Monitored network security devices such as firewalls, antivirus, and intrusion detection/prevention systems.
- Reviewed and implemented access controls security for networks assets and resources including security awareness training effectiveness.
- Performed a variety of tasks related to network administration, performance and maintenance.
- Including the installation, migration, and configuration of network devices (router, switches, servers, desktops) and associated equipment.
- Performed traffic and malware analysis utilizing current applications (BackTrack, Wireshark, Metasploit, etc.).
- Installed, configured, mitigated, troubleshoot, and migrated network security software and hardware applications.

#### Network Security Engineer

**ABC Corporation** - 2007 - 2010

- LAN/WAN Support and management of Johnson Controls global infrastructure.
- Performing blackbox penetration testing and ethical hacking on our remote sites to test for security vulnerabilities and security policy compliance.
- Creating security policies for new sites.
- Configuring switches, routers and wireless access points with latest security standards.
- Designing firewall rules for new connections and VPNs.
- Collaborating with Verizon on new circuit and router installs.
- Ordering cisco hardware and documenting.
