EXPERIENCE

Consultant, 02/2020 - 08/2021

Capita Plc. – Lincoln, NE

- Laid out consulting services governing orders, activities, schedules and employee performance.
- Broadened improvement initiatives by troubleshooting problems and recommending corrective actions.
- Placed orders for customer purchases and personal inventory to maintain consistent stock.
- Conducted events online and at individual homes to promote products.
- Kept customer information confidential and handled details accurately.
- Delivered high level of service to customers in effort to build upon relationships for future.

LPN, 02/2019 - 03/2020

Common Spirit – Lake Jackson, TX

- Collected and documented vital signs to track current patient conditions.
- Monitored patient's respiration activity, blood pressure and blood glucose levels in response to medical administration.
- Communicated concerns regarding clients' status, care and environment to nursing supervisors, clinical care supervisors and case managers.
- Responded to patient alarms and needs-assessment requests to identify course of treatment.
- Answered patient and family questions to educate on optimal treatment procedures.
- Promoted patient satisfaction by assisting with daily living needs such as bathing, dressing, toileting and exercising.
- Followed rehabilitation and treatment care plans to accelerate patient recovery, minimize pain and optimize patient outcomes.
- Prevented drug interactions and contributed to correct diagnosis by recording patient health information, monitoring vitals and updating patient files.
- Used sterile techniques to prepare patients for procedures.
- Charted changes in patient conditions and discussed concerns with supervising healthcare provider.
- Addressed patient care needs, collected vitals, dressed wounds and managed catheters.
- Observed strict confidentiality and safeguarded all patient-related information.
- Monitored infection control procedures to verify facility-wide health and safety.
- Assisted with patients' nutritional needs by setting up self-feeding assistance or directly feeding individuals with severely limited mobility.
- Managed patients' hygiene with comprehensive care for toileting, bathing and grooming needs.
- Directed implementation of improved patient care and documentation methods and procedures to achieve quality objectives.

LPN, 03/2017 - 01/2018

Common Spirit – Northridge, CA

- Collected and documented vital signs to track current patient conditions.
- Monitored patient's respiration activity, blood pressure and blood glucose levels in response to medical administration.
- Communicated concerns regarding clients' status, care and environment to nursing supervisors, clinical care supervisors and case managers.
- Answered patient and family questions to educate on optimal treatment procedures.
- Responded to patient alarms and needs-assessment requests to identify course of treatment.
- Documented patient intake and dietary requirements and aided with feeding and monitoring.
- Followed rehabilitation and treatment care plans to accelerate patient recovery, minimize pain and optimize patient outcomes.
- Prevented drug interactions and contributed to correct diagnosis by recording patient health information, monitoring vitals and updating patient files.
- Collected biological specimens and packaged for laboratory transport to complete diagnostic tests.
- Examined and addressed lacerations, contusions and physical symptoms to assess and prioritize need for further attention.
- Used sterile techniques to prepare patients for procedures.
- Charted changes in patient conditions and discussed concerns with supervising healthcare provider.
- Addressed patient care needs, collected vitals, dressed wounds and managed catheters.
- Cared for patients' acute and chronic wounds by changing dressings and applying medicated compounds.
- Observed strict confidentiality and safeguarded all patient-related information.
- Worked with registered nurses to deliver comprehensive, high-quality care to patients.
- Answered patient calls, identified issues and determined how best to provide assistance within parameters established by facility and supervisor.
- Inserted, cared for and removed patients' catheters and monitored fluid output.
- Administered prescribed medications and started intravenous fluids to address patient symptoms and underlying etiologies.
