WORK EXPERIENCE

Automobile Assembler, 2016–present

Fiat Chrysler Automobiles

- Monitored and inspected vehicles after assembly for proper functioning and specifications.
- Tested and calibrated parts and mechanisms to meet tolerances and product specifications.
- Used voltmeters to measure electrical current, analyzers to check the vehicle part by part, and timing devices to check the operation of electrical devices.
- Assembled, installed, inspected and fastened various parts of the automobile in a certain time limit according to the build manifest, utilized pneumatic and power tools.

Automobile Assembler, 2014–2016

Global Automakers

- Installed pre-fabricated parts and components to make new vehicles.
- Notified supervisor of substandard assembly work and defective parts, tools, equipment, and material or other conditions that hindered assembly process.
- Positioned and installed parts and sub-assemblies such as engines, transmissions, door panels, or instrument panels using hand and power tools and other aids like overhead hoists.
- Performed all tasks conducted by the team in the assembly process and rotate through all and most of them rather than being assigned to a specific task on a permanent basis.
