OPERATIONS MANAGER

Top performing Engineering Professional offering several years of experience providing customized solutions to international energy, Oil & Gas, and telecommunication leaders. Offering robust analytical and organizational skills with a strong technical and methodical aptitude. Expertise includes hands-on management for multi-million dollar projects, onshore and offshore Oil & Gas operations, and multi-national vendors and EPC's. Proven history in leading teams in all aspects of project development – from initial design and planning all the way through to commissioning and warranty support.

Broad international and multicultural background gained through extensive work with clients and partners from the Middle East, US, Europe, and Asia. Flexible and versatile in the face of ever-changing circumstances, with a proven history of thriving in challenging and extreme operating conditions. Astute strategic thinker and troubleshooter with an innate ability to identify needs and implement lasting solutions. Role models customer service, efficiencies, and conflict resolution by always maintaining a level head, diffusing stressful situations promptly and in a timely manner.
