##### UNIVERSAL TECHNOLOGICAL REINFORCEMENT SERVICE (UTRS), Wellesley-Anne, MA (Jan-Dec)

Aug - Present

###### Web Developer

Lead robust strategy for the design, deployment, and maintenance of sites in UTRS web service accounts. Manage and maintain several organization military intranet sites and public-facing sites. Conduct training on developing and maintaining scalable sites utilizing HTML5, CSS3, JavaScript, Bootstrap 4, jQuery 3, ASP.NET, and C#. Create a proof of concept sites for the commanding general. Utilized CRM and Java/JBoss REST API based SharePoint web applications. Address the needs and interests of all customers and collaborate cross-functionally to maximize results.

- Created and executed first-ever functionality that allowed efficient tracking of individual users visiting applications on new server set-ups; this was achieved by pulling user information from server headers and storing content in user object within the application's session pipeline.
- Designed Oracle JSF application in collaboration with team members while holding little experience in front-end frameworks; quickly gained knowledge of framework through extensive research to achieve desired results, driving simple customer satisfaction and earning a 95% rate.
- Streamlined operations by improving the ability to track projects through the TFS portal utilizing Git; studied TFS web portal to achieve a successful project management solution.
- Led the conversion of Oracle Java JSF Trinidad application to ASP.NET MVC leveraging advanced expertise in REST API Web Services; trained team members in .Net MVC utilization and successfully converted Oracle JSF Java to Bootstrap 4 ASP.NET MVC application with an API layer.

##### NATIONAL KITCHEN & BATH ASSOCIATION, Herndon, VA

2014 - 2016

###### Web Developer

Collaborated across multiple comprehensive projects within a fast-paced technology department. Performed application development and conducted efficient testing utilizing advanced knowledge of HTML, JCS3 – ASP.NET, TFS, and SQL Server. Managed user accounts and constructed custom modules. Overhauled content management system (CMS).

- Driven significant business growth for the company by extending web development services to multiple small businesses as proof of concept; successfully revamped, improved, and optimized two low-end sites.
- Created customized user control in SharePoint, allowing the marketing team to take ownership and accountability of press releases; employed built-out user interface to incorporate and publish content for clients; this allowed best fit focus on other aspects of the business.
- Designed robust intranet site for staff employing extensive knowledge of EBS; executed high-quality training on the Alfresco database system (front end).
