## SKILLS

## HOBBIES

Welding    Woodworking  
Building & Fixing Cars  
DIY Home Improvement

## EDUCATION

**University of Washington**  
Seattle, WA  
2002 – 2006  
Electrical Engineering  
GPA: 3.7/4.0

## CERTIFICATIONS

Professional Engineering License  
2020  
Certified HVAC Designer  
2019

## WORK EXPERIENCE

### Senior Mechanical Engineer, Venus Systems

Boise, ID • January 2013 – Present

- Evaluated and improved HVAC designs for cost effectiveness, reducing the cost of materials by 15%
- Collaborated with the Industrial Design team to ensure concepts are functional and can be manufactured
- Provided technical support to clients in solving quality problems with existing products
- Established the project schedule for 4 designs concerning HVAC systems and completed the projects 3 weeks ahead of schedule
- Specified equipment to be purchased using Purchase Requisitions and Bill of Materials
- Organized the installation of the equipment, including coordination with the customer and installation contractors
- Designed components of cooling and heat transfer systems
- Coordinated operations, maintenance, and repair activities for existing projects
- Developed the company's standard methods and procedures for testing products
- Directed 25 engineer personnel in testing and design procedures for new HVAC systems
- Oversaw fabrication and installation activities to ensure products and systems conform to engineering design and customer specifications
- Created project proposals for manufacturing improvements to support client demand
- Prepared project proposals, progress reports, and completion presentations , for management
- Lead design interdisciplinary coordination efforts to ensure delivery of a complete, approved, coordinated work product

### Mechanical Engineer, Honey Designs Inc.

Boulder, CO • January 2007 – December 2012

- Performed engineering calculations for things such as heat gain, heat loss, and energy transfer, pressure losses in air duct or hydronic piping
- Performed work in accordance with the Conduct of Engineering (CoE) and applicable Federal, State, and Laboratory codes and standards.
- Prepared conclusions and analysis reports for projects in the automobile, heating, and medical industries
- Devised alternative mechanical structures for medical laser equipment, reducing costs by 19%
- Developed new tools and systems to enhance production of commercial radio equipment
- Provided cost estimates for materials, equipment, and labor for 17+ projects
- Diagnosed and troubleshooted observatory mechanical and electro-mechanical systems
- Worked with team of 12 to design and build cooling equipment for use in laboratories
- Conceived, designed, and prototyped a light-weight antenna for use in car radios
- Played integral role in patent-pending cooling system for blood storage in hospitals
