Quality Manager

Summary

Analytical, Results-oriented Development Project Manager Professional with strong Organization, Planning and Execution skills to achieve project success. Quality and Six Sigma focused on Quality Management and Defect Prevention successes. Experienced in managing global development efforts related to IP hardware and protocol technology involving a complex mix of internal and 3rd party technology. I am dedicated to the appropriate application of processes to arrive at high-quality products. Large experience and knowledge in manufacturing operations management with the focus on cost reduction, process optimization and quality excellence.

Work Experience

2015-09 - Present	Quality Manager <i>Wipro Technologies</i> <ul style="list-style-type: none">Coordinate department quality goal planning, and quality audit and champion department quality improvements.The department has received a Division Quality Award in May 2017 resulting from my actions in reducing top problem root cause occurrences by a factor of five and decreasing development effort by 20%.Champion the identification and implementation of new department software development process improvements through Six Sigma and DMAIC. Training of new engineers in critical procedures and processes.Active participation and guidance in Division level Software Process and Defect Prevention Councils.
2012-08 - 2015-09	Quality Project Leader <i>Motorola</i> <ul style="list-style-type: none">Responsible to ensure QMT (Purchase Component Quality Engineers) target achievement for vehicle projects during series production face-lifts & minor-model changes. This included all Driving and controlling QMT target achievement within all vehicle projects.Directly support the industrialization of purchased components and their integration in the Spartanburg, SC plants for the ramp-up to series production. Planning and tracking of process series, capacity and, flexibility safeguarding QMT from Tier I and Tier II suppliers.Key role in risk identification and mitigation of any potential supplier-related risks to BMW product changes and new model launches.
2010-02 - 2012-08	Quality Manager <i>Berry Global Inc</i> <ul style="list-style-type: none">Managed process engineers, technicians, quality manager, quality engineers and laboratory analysts for a 324,000 sq. ft. - 210+ employee mfg. site producing over two (2) million lbs. per month of non-woven textile products for the medical, hygiene and industrial industries.
2008-01 - 2010-02	Advanced Engineering Manager <i>Intertec Systems LLC</i> <ul style="list-style-type: none">Introduced innovative capital justification systems, cost tracking, equipment design and specification with 0 ppm (part/million) and 100% efficiency targets 30 days post-launch. Managed USD \$27 million capital budget and generated over \$8 million in savings.Added innovative \$5.1 million powder casting operation and the new building to Ontario facility, in addition to paint systems, moulding presses, and state-of-art laser perforating operations that aid passive restraint airbag deployments.Mentored and influenced engineering team to increase program delivery despite a 20% reduction in staff.Developed a creative manufacturing layout that optimized material flow and production control and reduced floor space of one program from 27,000 sq. ft to 9,800 sq. ft.

Education

2007 - 2008	Master's Certificate in Project Management <i>The George Washington University</i>
