### OBJECTIVE

Looking for work as a C#.Net Developer in order to exercise my experience in the industry for your company.

### EXPERIENCE

#### C#.Net Developer, 2016 - Present

Open Systems Technologies, Inc.

- Designed and developed .Net-based Windows application that met data integrity, performance, business, and security objectives for complex application features.
- Oversaw standard development and change management methodologies were followed in the team.
- Worked with Software Architects, Product Managers, product developers, subject matter experts, and others on system architecture and interface development.
- Developed complex test plans to verify logic of new and modified programs.

#### C#.Net Developer, 2014 - 2016

Login Consulting Services Inc.

- Recommended, created and implemented IS policies, standards, and procedures for development and implementation of enhancements, interfaces, and new tooling.
- Designed and developed secure windows applications to integrate with our current suite of applications.
- Contributed to the development of technical standards and procedures at the workgroup level.
- Identified and implemented improvements in existing development lifecycle processes and procedures.
- Articulated and mentored concepts in approach to problem-solving.
