

AGRICULTURAL SCIENTIST RESUME

Summary:

A dynamic individual with exceptional knowledge in agricultural studies; has the devotion to improve the technology in agriculture; has conducted a series of lectures on the wellness and preservation of the environment; excellent communication skills.

Professional Experience:

Agronomy Research Manager January 2007 – present
University of Irvine – California, CA

Responsibilities:

- Gathered research and project results and compared with other professionals' findings.
- Recommended to farmers and other landowners innovative ways in which they can get best results from the land growth.
- Developed new methods in conserving and managing soil that can be applied by farmers.
- Conducted studies on soil problems and poor water conditions in order to determine source of the problems.
- Identified and developed plans to improve their chemical, biological, and physical characteristics of the soil.

Research and Analyst Consultant May 2004– January 2007
State University, Burley, ID

Responsibilities:

- Developed new methods of research and tests to study the mechanisms of biological processes.
- Coordinated laboratory teams, and evaluated the quality of the team's work.
- Organized research findings and initiated lectures at scientific conferences.
- Conducted research on the chemistry of living processes, such as cell development and aging process.
- Quantified the three-dimensional structure of biological macromolecules.

Research Environmental Scientist February 1999 – May 2004
State University, Boise, ID

Responsibilities:

- Gathered research and project results and compared with other professionals' findings.
- Recommended to farmers and other landowners innovative ways in which they can get best results from the land growth.
- Developed new methods in conserving and managing soil that can be applied by farmers.
- Conducted studies on soil problems and poor water conditions in order to determine source of the problems.
- Identified and developed plans to improve their chemical, biological, and physical characteristics of the soil.

Research and Analyst Consultant May 2004– January 2007
State University, Burley, ID

Education:

PhD in Biology, University of Arizona, 1999
Bachelor of Science in Agriculture, University of Arizona, 1997

Skills/Certifications:

- Excellent research skills
- Ability to maintain high level of quality of work to meet deadlines
- Excellent skills in handling laboratory test equipment and machines
- Excellent verbal and written communication skills

- Associations/Organizations:
