

PHILLIP L. WATERMAN

DATABASE MANAGEMENT

EDUCATION

Bachelor's Degree in Database Administration, 2012.

Ashford University, Ashford, NY.

PROFESSIONAL SKILLS

Database Management | Prospective

2016 – Present

- Created post-collection quality control specifications; programming and executing code on audit data using SQL and DTS.
- Assembled and compiled data from various sources.
- Worked with Information One system administration to troubleshoot development and production issues.
- Managed the flow of web-based tools between regions throughout the development process.

Database Management | Leader

2014 – 2016

- Monitored, analyzed, and created audit data quality reports using a combination of statistical concepts and SQL/DTS.
- Tested completed databases/applications with Business Analysts, SME's and process stakeholders for issue resolution or approval for implementation.
- Created database objects and maintained their physical organization/relationships.
- Designed, built, tested, deployed, executed and maintained data extraction, transformation and load (ETL) jobs to populate databases.

Database Management | CIOA

2012 – 2014

- Analyzed data in determining issue identification, impact to business, and estimating workload/cost.
- Managed the on-site backup and recovery process and supported the off-site backup and recovery teams.
- Planned for and executed any required database upgrades and migration (patches etc.).
- Implemented new databases into production while also providing technical assistance, live demonstrations and additional training to end-users.
- Provided technical expertise and products to enable improvements in service quality, productivity and cost reduction.
