

# BRENDAN NAJARRO

Mechanical Engineer

1515 Pacific Ave, Los Angeles, CA 90291, United States

(541) 754-3010

email@email.com

Place of birth ..... *San Antonio* Driving license ..... *Full*

Nationality ..... *American*

## LINKS

*Github, Linkedin, Facebook*

## PROFILE

*Technically orientated Mechanical Engineer with over six years experience in reliability and maintenance activities within a clean room environment. Highly adept with mechanic supporting sanitation systems and equipment. Completed a Masters Degree in Thermodynamics and holds a Professional Engineering license.*

## EMPLOYMENT HISTORY

❖ **Mechanical Engineer III , Zimner Medical Devices** ..... May 2018 — Present  
Fort Lauderdale

*Responsible for reliability testing of more than 30 pieces of outdated machinery and improved their efficiency by 70% with minor design tweaks.*

- Test CNC machinery and equipment to ensure they function correctly and schedule preventative maintenance activities
- Coordinate reliability testing and devise planned maintenance schedules to coincide with commissioning activities
- Facilitate the safe testing and commissioning of all high voltage machinery and equipment
- Make sure all PLC are tested and maintained according to the operational requirements of the plant

❖ **Mechanical Engineer II, Corneing Thermodynamics** ..... Jan 2017 — May 2018  
Tewksbury

*Part of the product development team that conceptualized more than 15 thermal devices in the last quarter and received a 100% pre-approval rating for all prototypes presented.*

- Support the entire production process regarding quality inspections and cost improvement initiatives.
- Collaborate with mechanical packaging-designers and electrical engineers to define upcoming projects in terms of timeframes, financial resources, and allocation of labor
- Create 2D and 3D schematics and drawings on Solidworks and AutoCAD
- Monitor project progress, record test results, write quality reports and submit to senior engineer for final approval

❖ **Mechanical Engineer I, Confluence Devices** ..... Jan 2016 — Dec 2016  
Borger

*Improved the undisrupted equipment reliability by adding two extra planned maintenance schedules per quarter resulting in zero shutdowns due to machine failures in the last 12 months.*

- Design product concepts, build prototypes and conduct testing and validation on Class I medical devices
- Establish ongoing relationships with potential overseas private equity firms to secure funding for commercialization of pilot products
- Interact with potential manufacturers and create proposals to set up assembly lines, packaging requirements and production specifications
- Define product specifications, wrote inspection and testing manuals and draft failure analysis reports
