SENIOR DATABASE ADMINISTRATOR - *leveraging +10 years of experience*

Database administrator with substantial experience in Oracle enterprise and SQL Server settings designing, coding, testing, and supporting next-generation database solutions. Proven ability to tackle and succeed in all endeavours from high-dollar business development to customized software development and implementation. Repeatedly successful in navigating complex technical environments, and possess strong, PL/SQL expertise in stored procedures, performance tuning, and optimization.

Exceed ongoing and overlapping deadlines in fast-paced environments, handle multiple assignments simultaneously and coordinate deliverables with key stakeholders in cross-functional groups. Proficient in an assortment of technologies, including Oracle 12c, DB2, Access, Sybase, MS SQL Server 2016, JDBC, Visio, Apache HTTP Server, Java, C++, XML, Windows, Linux and Unix.

PROFILE SUMMARY

- Highly skilled in managing deployment and overseeing maintenance of new databases, new schemas and new database objects
- Proficient in contributing to defining application database standards and creating application data models
- Rich experience in managing database performance in the context of applications while working closely with infrastructure and application teams
- Expertise in code optimization and improving database efficiency through Maintenance tasks Re-Indexing, Updating Statistics, Recompiling Stored Procedures.
- Skilled at validating and thoroughly testing deduplication of backup data by integrating networker backups with EMC Data Domain.
- Accomplished in designing and implementing a configurable Application and data security model to ensure controlled access to the data on production, test and development environments.
- Expert at using Oracle Identity Management to centralise and automate user provisioning and security coordination.

CORE COMPETENCIES

- Software Proficiency
- Cash Management
- Financial Auditing
- CPA
- Data Analysis
- Asset Management
- Budgeting Procedure
- Forecast Planning
- Cost Accounting

PROFESSIONAL EXPERIENCE

Bellurbis LLC, Greater Noida   Jan. 2019 – Oct. 2021
Senior Database Administrator

- Implemented data guard with maximum availability, protection and performance configurations and worked with data guard fail over and switch over cases at the times of up gradation and migration.
- Experienced in data center migration of databases to prepare the proof of concept, db migration procedures and scripts, developed templates that include check list for migrating the databases.
- Configured repository and clients for grid control and also implemented db control for some databases.
- Utilized oracle streams to capture, propagate and apply the transfer of data, transactions and events within managed databases.
- Perform database upgrades, migrations; take logical exports from the qa, dev etc instances and importing the data on to the production systems etc.
- Upgraded multiple single instance databases and grid infrastructure from 11gr2 to 12cr1.
- Worked on new features on 12c databases such as recovering tables, masking the fields, using advanced optimization parameters for good performance of 12c databases.
- Experience in troubleshooting RAC databases and engaging with the application team for gaining performance enhancements for application in a clustered environment.
- Applied psu on standalone test environment using opatch and same psu(grid and rdbms patching on production cluster using opatch auto.
- Supported in performing golden gate configuration, administration, installation, also configuring pumps and managing trail files by purging old extract files and log files.
- Implemented physical standby databases on 2-node 11gr2 real application cluster and automized scripts to delete archive logs that already applied to standby.

Space Consultants, Greater Noida   Apr. 2015 – Dec 2018
Database Administrator

- Managed projects from business requirements research to solution delivery and support as a DBA or project lead on more than 80 medium- to large-scale deployments.
