Objective

Over 9+ years of experience as a SQL DBA. Strive to bring creativity to problem-solving and have strong time management and organizational skills. Communicate with diplomacy and tact, and work to provide strong customer service focused attitude Responsible for interviewing, evaluating, training, and developing junior SQL DBA team members.

Skills

Microsoft SQL Server, SSIS, SSRS, SSAS, SQL, Database Management, Microsoft Administration, Linux Systems Administration, and Linux Systems Administration.

Work Experience

Database Administrator

ABC Corporation - October 2010 – Present

- Supporting the data center move from the childrens memorial hospital to the newly built Lurie childrens hospital.
- Defining and implementing SQL onboarding process including a residency policy.
- Defining and documenting standards for installations, drive layouts, performance benchmarks, file configurations, shared environments.
- Implementing 9 production and 2 test always-on high availability groups in SQL 2012/2014 which, were a mix of physical and VM servers.
- Architecting the SQL listener on named instances requiring additional configuration.
- Designing and implementing the SQL data layer for a network resource allocation and asset tracking application from scratch to handling the hospital network infrastructure of 30,000 network runs and 45,000 devices at the start of the new hospital.
- Building shared SQL environments in SQL 2008, 2012, 2014 moving away from 1 to 1 application/instance ratio, providing data resources instead of a database server for every need.

Database Administrator

ABC Corporation - June 2010 – October 2010

- Implemented a structured code promotion schedule to manage daily production code rollouts.
- Starting to put a process in place like change control and beginning to standardize the rights of everyone including the data team.
- Developed both SSIS and DTS development and maintenance for internal and third-party applications.
- Identifying locks, detecting locked and blocked objects session, and releasing the same for maintaining the database performance.
- Supported SSIS packages for ETL projects as well as supporting vendor SSIS packages.
- Moving the archived logs to the backup destination and regularly clearing the archived log files.
- Virtual edge source system has over 100gb of data on ms SQL server database for nearly 300 clients.
