CAREER OBJECTIVE

To obtain an ecommerce QA Tester position in an organization where I can use my skills and experience to its fullest potential.

JOB DUTIES

E-Commerce QA Tester Quali Test Group
2016 – Present

- Evaluated and tested new software applications according to business and functional requirements.
- Worked closely with software developers to identify, troubleshoot, and verify bugs.
- Executed test cases on domestic and international ecommerce and experiential websites and content management systems.
- Planned and conducted the analysis, design, test, and integration to assure the quality of large and complex projects.
- Validated the accuracy of the exchange of information between Under Armour's websites and third-party systems.

E-Commerce QA Tester
2014 – 2016

- Communicated significant issues and developments identified during quality assurance activities and provided recommended process improvements.
- Conducted detailed analysis, evaluated requirements, developed detailed test cases, created testing matrices, and executed manual and functional test cases.
- Performed functional, usability, platform compatibility, and stress testing for web applications.
- Performed API level testing, system testing, functional testing, and UI testing.
- Conducted cross-platform compatibility testing across supported browsers, operating systems, tablets, and mobile device to ensure a consistent customer experience.
