PROFILE	**SAP Consultant with visionary design and strong problem solving skills**

- **20** years SAP experience
- **SD, LE, PP, MM, PS, QM, CO** configuration experience
- **VC** Variant Configuration, **ABAP** programming experience in several modules
- Coaching consultants and SAP Staff
- Excellent business know how in all areas of logistics in different industries
- Strong methodology knowledge

EXPERIENCE

Analysis

Identified key SD/LE/PP/MM/PS/QM business processes, mapped requirements to SAP, and identified gaps to be addressed during the design stage. Wrote handbook about the methodology to use for documentation of processes in analysis and design phase.

Design

Developed new cross functional business processes for SAP as a guideline for the detailed design in the different teams. Wrote SAP SD, LE, PP, MM, PS, QM scripts and training documents. Composed design specifications for new transactions and reports. Designed new functions and scenarios for using SAP on the Internet.

Configuration

Configured SD, LE, PP, MM, PS, QM modules in all important functions

SD: 14 Implementations
Master data, document types, incompletion log, document flow, condition technique/pricing, requirements transfer and availability check, account determination, shipping, billing

LE: 10 Implementations
Outbound deliveries, picking, packing, goods issue, batch and serial number management, inspection lots, Transfer requirements, transfer orders, putaway, inbound deliveries

PP: 8 Implementations
BOM and recipes, work centers, master recipes, routings, process instructions, SOP, demand management, MRP, process orders, production orders, capacity planning, distribution planning, variant configuration, settlement

MM: 8 Implementations
Master data, MRP, forecast, purchasing, batch management, incompletion control, inventory management (IM), warehouse management (WM), invoice verification
